## PROJECTS

Hospital Management System (Website Designing) using HTML, Jalandhar FEB 2018

- Hospital Management System:- Developed a basic website for a Hospital. The main functions of the website include storing and retrieving the records and details of the hospital, staff and patients. Useful for the easy access to the hospital basic information and address for any common man. Softwares used in the project were HTML, cascading style and JavaScript.

Mini ATM Machine using C language, Jalandhar DEC 2017

- ATM machine:- This project is used to calculate the amount of individual persons credited amount, debit amount, balance amount. And I used in the project were C language.
